

SARDAR MD. SAFFAT ZABIN

☎ +8801710520808 | @saffatzabin08430843@gmail.com |  LinkedIn |  GitHub | 📍 Dhaka, Bangladesh

SUMMARY

Full stack Software Engineer building scalable services with **React**, **Spring Boot**, **FastAPI**, and **PostgreSQL**, with experience in **REST APIs**, **LLM systems**, **RAG**, and **AI agents**. Experienced in deploying production SaaS on **AWS** using **Docker** and **CI/CD**.

SKILLS

Programming Languages: Java, C/C++, Python, TypeScript, SQL

Web & Application Frameworks: Spring Boot, FastAPI, Celery, React, Shadcn, JavaFX

Databases: PostgreSQL (with pgvector), MySQL

Cloud & Infrastructure: AWS (Cognito, EC2, RDS, S3, CloudFront, ECR, ACM), Google Maps Platform, Redis, Nginx, Firebase

DevOps & Version Control: Docker, Docker Compose, GitHub Actions, Git, GitHub

AI/LLM Frameworks & Tools: LangChain, LangGraph, Gemini API, Claude Code, Codex

WORK EXPERIENCE

Sazim Tech Ltd.

Dhaka, Bangladesh

Software Engineer (L2)

June 2026 – Present

- Built an LLM-powered CV analyzer that scores candidates on education, experience, and skills against a job description, with real-time progress updates via SSE. **Tech Stack:** NestJS, Next.js, PostgreSQL, BullMQ, LangChain.js
- Developed backend APIs for a KSA-based platform. Integrated **Salesforce** for customer support ticketing and **Lean Technologies** for IBAN ownership verification against users' National ID or Commercial Registration number, and business verification against Ministry of Commerce records. **Tech Stack:** Spring Boot, Next.js, PostgreSQL, Redis

OPlusDojo (Remote)

Toronto, Canada

Software Engineer

Sep 2025 – Feb 2026

- Built an async document ingestion and **RAG** pipeline with **FastAPI**, **LangChain**, **LangGraph**, **Celery**, **Redis**, **S3**, and **PostgreSQL/pgvector**; used **Gemini** for structured extraction, embeddings, semantic search, and LLM-evaluated answers.
- Implemented stateless **JWT authentication** and access control using **AWS Cognito**.
- Optimized backend APIs using **RDS PostgreSQL + pgvector** and **S3 presigned URLs**; reduced frontend API round-trips by **67%** and improved **p95 latency from 1851 ms to 750 ms** through endpoint restructuring and indexing.
- Maintained **GitHub Actions** CI/CD for Docker builds, image tagging, and AWS dev deployments; configured API and MCP **ALBs** behind **CloudFront** for production traffic.
- Built dashboard views and reusable platform components using **React + TypeScript + Shadcn** ([ralfh-dev.com](https://github.com/ralfh-dev)).

Apurba Technologies Ltd.

Dhaka, Bangladesh

Full Stack Developer (L-1)

Mar 2025 – Oct 2025

- Built a **JavaFX** desktop tool to convert legacy ASCII Bangla fonts to Unicode with concurrent processing (ExecutorService), progress tracking, and cancellation; extended the tool into a full-stack web platform using **Spring Boot** (backend) and **Angular** (frontend); deployed via **Docker Compose** on a government server (ocr.bangla.gov.bd).
- Designed a YAML-configured, cron-based cleanup scheduler in **Spring Boot** that deletes temporary OCR files under environment-specific policies (e.g., hourly in dev, weekly at 3 AM in prod), eliminating manual storage maintenance.

PROJECTS

UrbanNest: Real Estate Platform | [Backend](#) | [Frontend](#)

- Designed a layered **Spring Boot** backend (DTOs, **MapStruct**, **OpenAPI**) with **Flyway** migrations on **PostgreSQL (AWS RDS)**.
- Built dynamic search with **JPA Specifications** and fixed N+1 queries via **@EntityGraph**, cutting **81+ queries per page to 2-3**.
- Built secure authentication using **Firebase JWT + Spring Security**; protected sensitive data with **AES-256-GCM encryption** and **SHA-512 hashing**; implemented file uploads via **AWS S3 presigned URLs**.
- Integrated **Google Maps Platform** (Maps JS, Places API, Geocoding API) for interactive location selection, reverse geocoding, and nearby place search with client-side caching and radius overlays in the UI (**React + TypeScript**).
- Deployed containerized services using **Docker** via **GitHub Actions** → **ECR** → **EC2**, with **Nginx reverse proxy** and **Let's Encrypt SSL termination**; frontend delivered through **S3 + CloudFront (ACM)** CDN.

EDUCATION

Bangladesh University of Engineering & Technology (BUET)

Dhaka, Bangladesh

B.Sc. in Computer Science and Engineering

2020 – 2025
